Dear Rob,

My wife and I wanted to write to you to express our appreciation for the job you and your team did in sealing the crawl space in our home. When we contacted you, there had already been two instances of leakage problems in our neighbourhood, both of which had been resolved by long processes of digging up yards, replacing drains and drainage material, etc. This was the frustrating and expensive solution.

The process you used to seal the concrete by actually binding the agent into the concrete itself was straight forward and less expensive. Your team has been professional, your follow up has been excellent and we are very happy to have a dry crawl space. I would recommend the Concrete Philosopher to any home owner looking to resolve water problems.

Thanks again Rob and we wish you continued success in your business.

Best regards,

Greg Sims
