**Re: Rob Hamilton  
The Concrete Philosopher**

Rob Hamilton of the Concrete Philosopher was recommended to us after our unsuccessful attempts to solve a moisture issue in the basement of our newly purchased home. He suggested that we seal the concrete floor and walls with a product from Kryton Canada.

Rob's expertise, enthusiasm, and quality of work were as solid as the product he espoused. It was clear that he deeply cared about our well being and committed to addressing our needs promptly by fitting us into his busy schedule. Since the application, our basement has stayed dry through 6 months of record rainy Squamish weather and free of any unpleasant moisture odours.

At no time did Rob waiver in his belief for the Kryton product and he was more than willing to back up his the product and his work with a 5 year guarantee. He was always available to answer questions and concerns, following up with several visits to check on the curing process.

Rob has also sealed our garage floor and we would not hesitate to recommend him as a great problem solver for all concrete concerns.

For additional endorsement please call 604-892-9225.
